SUMMARY

Software engineer with 10+ years building systems that are hard to break and easy to scale — from factory automation to backends handling 3,000+ req/s at peak. Treats technology as a tool for delivering business results. Has led teams of 5–7 engineers and owns system design from PoC to production.

EXPERIENCE

Vulcan Coalition Co., Ltd.

Bangkok, Thailand (Hybrid)

Senior Software Engineer → Project Manager / Technical Lead

Jan 2026 – Present

- Architected backend and data platforms for enterprise clients: a transaction risk engine for **Thai Samsung Electronics**, an AI purchasing and market research system for **Taokaenoi (TKN)** and an LLM-powered LINE contact center with RAG and human handoff
- Led solution architecture for client bids, covering system design, man-day and cost estimates
- Partnered with BD and the CEO as the technical lead in pitches and client engagements, translating business goals into delivery plans
- Established weekly knowledge-sharing sessions and hands-on labs for the engineering team

Zero Friction Co., Ltd.

Bangkok, Thailand (Hybrid)

Software Engineer

May 2024 – Dec 2025

- Led a backend squad of **5–7 engineers**, owning architecture, service boundaries and production reliability
- Architected an ad delivery system peaking at **3,000+ req/s**
- Partnered with the CTO on PoCs for the **Sumo Roadside** platform, integrating whichever third-party services the product required, including GB Prime Pay (Xendit), Google Places API and FlowAccount
- Developed Go **microservices** communicating over REST, gRPC, RabbitMQ and Kafka
- Introduced new technologies where they fit the problem, such as GraphQL for custom dashboards
- Built real-time chat, live bidding, location tracking and notification features
- Operated an Apache APISIX gateway and Nginx load balancers on Virtuozzo Cloud
- Received the company's Most Appreciated Colleague Award (2025)

Swift Dynamics Co., Ltd.

Bangkok, Thailand (On-site)

Backend Developer

Nov 2022 – May 2024

- Built a real-time IoT metrics platform for **Airports of Thailand (AOT)**: MQTT ingestion peaking at **2,500+ msg/s**, live WebSocket dashboards and automated alerts
- Developed custom real-time dashboards and Figma-like collaborative document editing over WebSocket for **CHPP** and **Ananda Development**
- Rebuilt the Gantt subtask calculation to recompute only affected nodes in the WBS hierarchy, migrating recursive Python to Go backed by Redis and cutting runtime from **4 hours to ~10 seconds**
- Implemented MS Project-compatible import and export for **Gulf Energy Development** project plans with 10+ year timelines

Career Transition

Software Engineering Upskilling Jan 2022 – Nov 2022

- Retrained from industrial automation to backend software engineering through intensive coding practice and courses in Go, backend development and network protocols
- Built a personal portfolio website on a JavaScript stack and a low-code AppSheet mobile app for monitoring blockchain data
- Ranked **15th of 14,689** participants in the BornToDev DevLab 3 Open Access Program (Jul 2022)

Synergetech Co., Ltd.

Nonthaburi, Thailand (On-site)

Automation System Engineer / System Integrator Jul 2016 – Jan 2022

- Delivered end-to-end industrial control systems for **Colgate-Palmolive, Lion and PepsiCo**, spanning PLC, SCADA and VMware vSphere across Modbus TCP, Profibus, CIP and other legacy protocols
- Developed MES and mobile web apps for Lion that communicated directly with Schneider Electric and Allen-Bradley PLCs and SCADA systems

SKILLS

Architecture	Fault-tolerant and scalable system design, service boundaries, event-driven design, API design, solution scoping, man-day and cost estimation, SLA definition
AI / LLM	LLM integration, RAG, multi-assistant routing, human-in-the-loop workflows
Languages	Go, Python, TypeScript, JavaScript, Shell
Backend	Fiber, NestJS, Express, FastAPI, Django, REST, gRPC, GraphQL, WebSocket, SSE, webhooks
Messaging	Kafka, RabbitMQ, Redis Pub/Sub, MQTT, Google Pub/Sub
Data	PostgreSQL, MySQL, SQL Server, MongoDB, InfluxDB, Redis, Firebase
Infrastructure	Docker, APISIX, Nginx, Linux, CI/CD, AWS, GCP, Virtuozzo, VMware vSphere
Frontend	React
Industrial	PLC, SCADA, Modbus TCP, Profibus, CIP

EDUCATION

King Mongkut's Institute of Technology Ladkrabang

Bangkok, Thailand

B.Eng., Automation Engineering 2012 – 2016
